

Project Management

Execution & Leadership

**Did you
know?**

‘Soft skills are increasing in importance for project managers. 51% of respondents in PMI's 2018 survey said that soft skills are more important today, while only 19% said that this skill requirement is unchanged.’

(Cohen, 2020)

Documents produced through execution phase <

Key performance areas <

Soft vs hard skills <

Directive vs supportive leadership <

Objectives

Lesson 6

Project execution

Execution

Focuses on:

- The project team
- Processes enforced in the project plan
- Sharing information effectively

Tasks involved in project execution

Acquire, develop, & manage the team

Execute project scope

Recommend changes/fixes

Timely communication with all stakeholders

Tasks involved in project execution

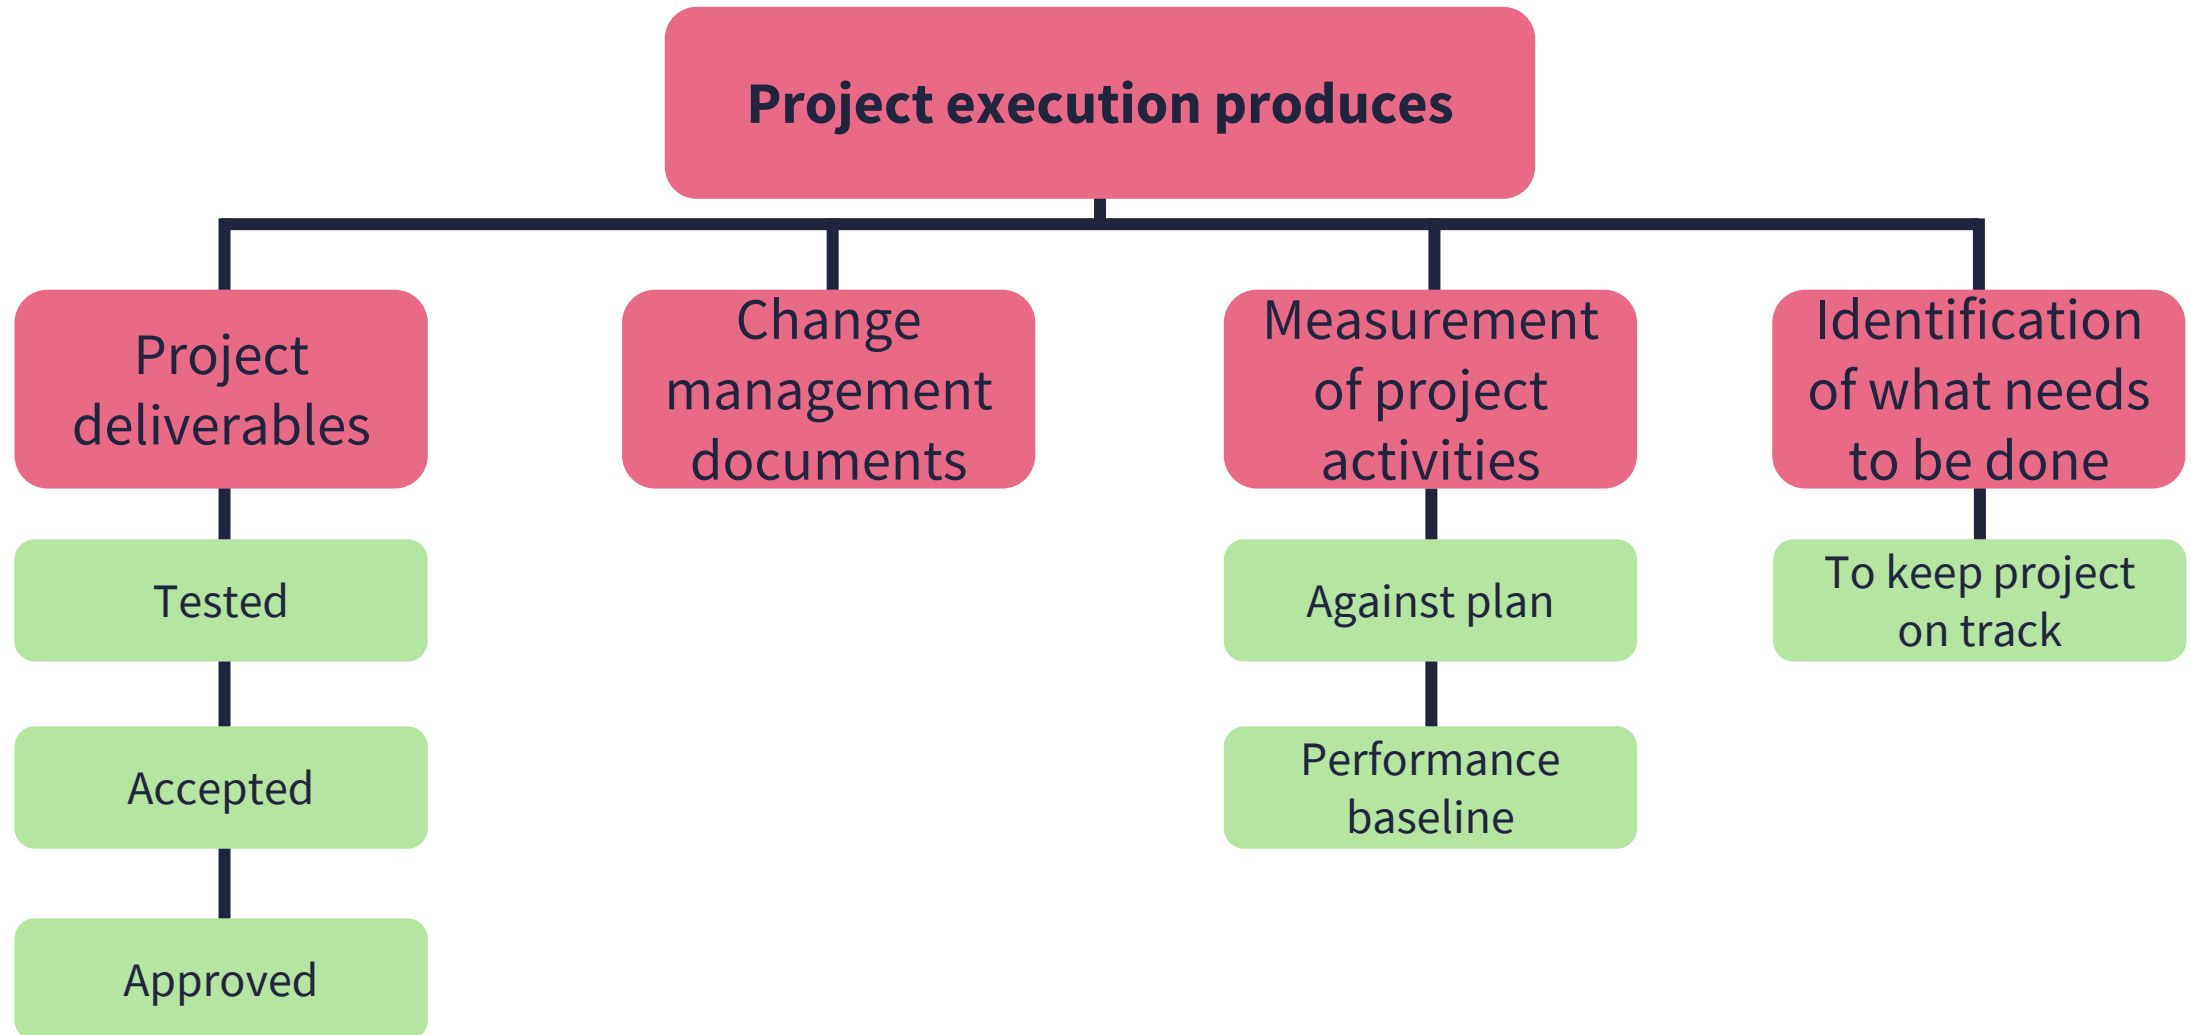

Give recognition and rewards to team members and keep them motivated

Hold status review

Manage and review ongoing costs & project scope

What does the execution phase produce?

+ Six primary gaps that prevent successful project execution

Absence of common understanding

Disengaged executive sponsors

Misalignment with strategic goals

Poor change management

Ineffective corporate governance

Lacklustre leadership

Project leadership

Soft skills

- Not specific to any job
- Ability to communicate
- Personal traits
- Luckily, these skills can still be learned even if they don't come naturally to you. With a little hard work, you can master the skills you need

Soft skills examples

- Critical/creative thinking
- Work ethic
- Conflict resolution
- Collaborative skills

**What do you consider to be your
strongest soft skill?**

Hard skills

Skills that can be:

- Taught
- Defined
- Measured
- Evaluated

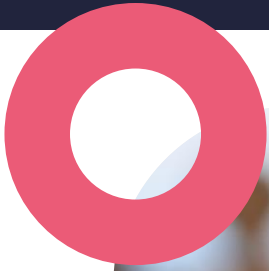

Specific skill sets/abilities that contribute to the success of your job

Hard skills examples

- Diplomas/Degrees
- Being multilingual
- Programming languages
- Accounting skills

Which one do you think is the most important?

Directive leadership

Being task-oriented

Dominating interactions

Demonstrating control over subordinates

Personally managing the completion of tasks

Directive leadership

Supervising closely

Pressuring employees to complete targets accurately and efficiently

Focusing on time management

Supportive leadership

- Meeting employee needs & preferences
- Showing concern for employee welfare, individual/group needs, and conflict within the group
- Encouraging a supportive work environment
- Providing positive feedback

Supportive leadership

- Fostering team cohesion and openness
- Inviting employees to be part of the decision-making process
- Promoting positive morale
- Facilitating discussions

Which
leadership
style do you
use?

What qualities
do you look for
in a leader?

Challenge

Identify your top 3 Soft and Hard Skills then ask a friend or family member to do the same and compare the results
