»» Stress explained

Stress is your body's way of responding to any kind of demand or threat. When you sense danger—whether it's real or imagined—the body's defences kick into high gear in a rapid, automatic process known as the 'fight-or-flight' reaction or the 'stress response.' The stress response is the body's way of protecting you.

Common cause of stress

- Fear about job security
- More overtime due to staff cutbacks
- Pressure to perform to meet rising expectations but with no increase in job satisfaction
