# Leadership & Management

Build your Resilience

## Objectives

Explore the concept of resilience d <

Discuss various resilience tools <

Explore resilience exercises <

A man in a dark suit stands with his back to the camera, looking out over a city at sunset. He is holding his hand to his forehead, shielding his eyes from the bright sun. The city below is bathed in the golden light of the setting sun, with buildings and streets visible. The sky is a mix of orange, yellow, and blue.

**Did you know?**

- Unhealthy and difficult work environments contribute to premature death of U.S. workers.
- Demanding workloads accounted for \$48 billion in U.S. healthcare expenditure.
- Initiatives and programmes that foster a resilient and mentally healthy workplace increase productivity, lower healthcare costs, lower absenteeism and decrease turnover.

# Resilience explained

## Resilience explained

Resilience exists when a person can bounce back and thrive from major challenges. It is often tested when stress factors arise in everyday life and when trauma or tragedy strike. Stress is not the only factor that can test a person's resilience; however, how a person handles stress is a strong indicator of their ability to bounce back.

# Impact of resilience

As employers build and improve workplace culture and resilience, they also seek ways to address workplace stress and mental health. When addressed, employers build a resilient workforce, employees handle work stress better, and develop protective factors against stress.

# Types of resilience

**Physical  
resilience**

**Mental  
resilience**

**Emotional  
resilience**

# What hinders resilience in the workplace?

- Lack of management
- Controlling managers and leaders
- Bullying
- Excessive workload
- Excessive change
- Lack of security
- Remote work

# Benefits of resilience in the workplace

- Reduced burnout
- Improved company effectiveness
- Improved expectations
- Adaptive workforce
- Improved communication

# Become more resilient

Accept change

Be ready  
to learn

Take charge

Find your  
purpose

# Become more resilient

Create balance

relationships

Reflect

Reframe skills

# Resilience tools

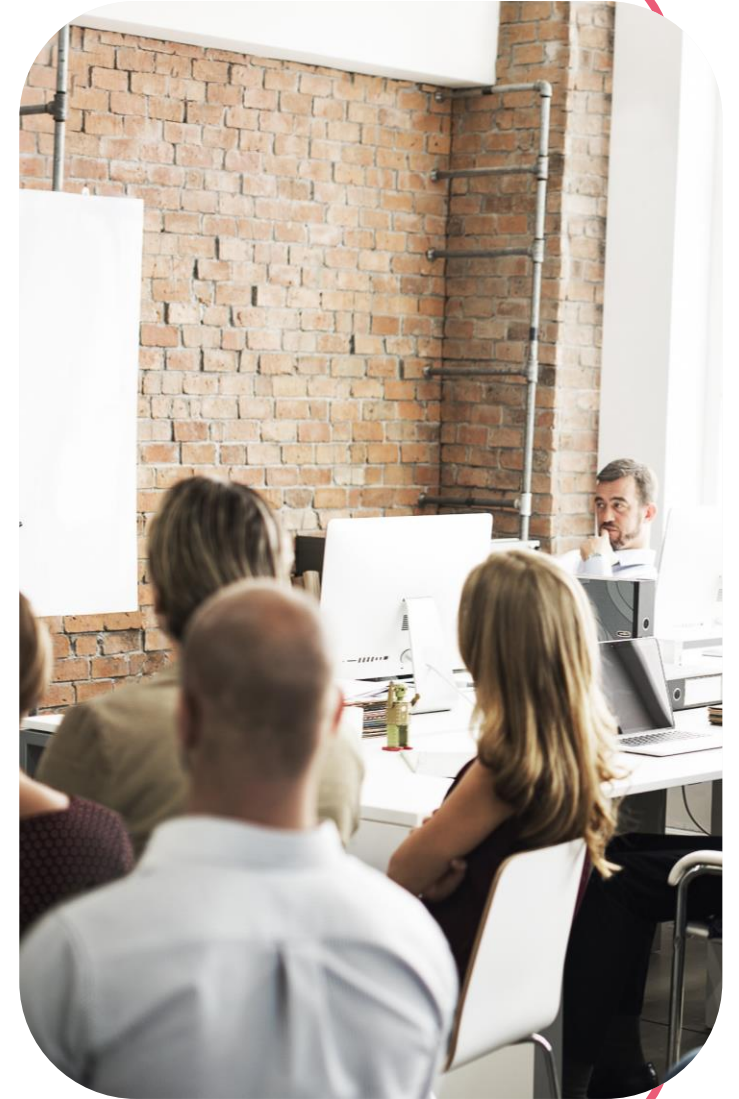

**Did you  
know?**

- Unhealthy and difficult work study carried out by CV-Library revealed that 57% of employers see resilience as a key skill for candidates.
- Meanwhile, 71% viewed adaptability as a key skill, which is a core aspect of resilience. These results reveal that businesses place high value on employees who demonstrate resilience.

# When to consider resilience training?

- Overcoming interpersonal challenges
- Managing emotions
- Investigating burnout
- Coping with stress
- Sleeping habits
- Remaining calm

## It is time to reflect

- What happened?
- What was I thinking and feeling at that time?
- How did I get through it?
- What did I learn?

## Build a resilient workforce

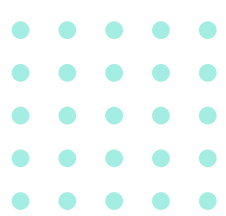

- Guides and checklists
- Training
- Debriefing
- Work culture

# **Resilience building exercises**

# Resilience building activities

Three good things:

- Fredrickson's broaden-and-build theory
- Reflect on your day
- Write down 3 good things

# Resilience building activities

Design a flow activity:

- Seek out a new flow experience
- Skills and focus
- Goal-directed
- Provided feedback

# Resilience building activities

Take your resiliency inventory:

- Created by Al Siebert
- Rate yourself from 1-5
- 1= strongly disagree
- 2= strongly agree

# Resilience building activities

Mental toughness:

- Takes less than 2 minutes
- Focus on your breathing
- Recite a personalised identity statement
